MINING FACULTY

DEPARTMENT OF TRANSPORT SYSTEMS AND TECHNOLOGIES

WORK PROGRAM OF THE ACADEMIC DISCIPLINE
″ Technology of production of unconventional hydrocarbons ″

Field of study……………………..... 18 Production and Technology

Specialty............................... 185 Oil and Gas Engineering and Technology

Academic degree......................... Bachelor

Academic program...... Oil and Gas Engineering and Technology

Language of study........................ English

Dnipro
NTU "DP"
2018

Work program of the academic discipline "Technology of production of unconventional hydrocarbons" for bachelor's specialty 185 "Oil and Gas Engineering and Technology" / EA Korovyaka, AA Dmitruk / NTU "Dnipro Polytechnic" Department of transp. systems and techn.. - DA: NTU «DP» 2018 - 13 p.

Autors:

Korovyaka EA, assistant professor of transport systems and technologies
Dmitruk EA, assistant of the department of transport systems and technologies.

The work program regulates:

– key goals and objectives;
– the disciplinary learning outcomes generated through the transformation of the intended learning outcomes of the degree program;
– the content of the discipline formed according to the criterion "disciplinary learning outcomes";
– the discipline program (thematic plan by different types of classes);
– distribution of the discipline workload by different types of classes;
– an algorithm for assessing the level of achievement of disciplinary learning outcomes (scales, tools, procedures and evaluation criteria);
– criteria and procedures for evaluating the academic achievements of applicants by discipline;
– the contents of the educational and methodological support of the discipline;

The work program is designed to implement a competency approach in planning an education process, delivery of the academic discipline, preparing students for control activities, controlling the implementation of educational activities, internal and external quality assurance in higher education, accreditation of degree programs within the specialty.

CONTENTS

1 DISCIPLINE OBJECTIVES

In the educational and professional programs of the Dnipro University of Technology specialty 185 "Oil and gas engineering and technology", the distribution of program learning outcomes (NRN) for the organizational forms of the educational process is done. In particular, the following learning outcomes are attributed to the discipline V1.2 " Technology of production of unconventional hydrocarbons ":

VR1.1	Create technology of drilling oil and gas wells
VR1.2	Build oil and gas wells

The objective of discipline - formation of competences on the foundations of extraction of unconventional hydrocarbons.

The implementation of the objective requires transforming program learning outcomes into the disciplinary ones as well as an adequate selection of the contents of the discipline according to this criterion.

2 INTENDED DISCIPLINARY LEARNING OUTCOMES

Code NRN	Disciplinary learning outcomes (DRN)	
	DRN code	**content**
VR1.1	VR1.1-V1.2-1	characterize the state and prospects of oil and gas from unconventional sources
	VR1.1-V1.2-2	be aware of the possible extraction of unconventional gas
	VR1.1-V1.2-3	an idea of technology extraction of unconventional hydrocarbons
VR1.2	VR1.2-V1.2-1	understand the current state of development of coal, shale gas and prospects and biogas production gas hydrates in Ukraine
	VR1.2-V1.2-2	assess environmental problems of extraction of unconventional hydrocarbons
	VR1.2-V1.2-3	Know the benefits and risks of energy production from alternative sources

3 BASIC DISCIPLINES

Subjects	The acquired learning outcomes
Introduction to F1	maintain and increase moral, cultural, scientific achievements and values of society by understanding the history and patterns of development oil and GasIts place in the overall system knowledge about nature and society and the development of society, technology and technology
	communicate with other professional groups at different levels (with experts from other disciplines / economic activities)
	know the overall structure, relationships and functionality of individual elements of the system of Ukraine hydrocarbons
F2 Basics oil and gas business	know the history and prospects of oil and gas sector of Ukraine and the world
	describe the main elements of naftohazopostochannya
	know the basics of creating elements of technological schemes and technical equipment of production, transportation and storage of oil and gas

Subjects	The acquired learning outcomes
	be aware of drilling oil and gas wells
	have an understanding of the technology of extraction, transportation methods and means of storage of carbohydrate energy
	know the basics of normative and technical support for the creation, operation and recovery systems and technologies for energy production of hydrocarbons

4 WORKLOAD DISTRIBUTION BY THE FORM OF EDUCATIONAL PROCESS ORGANIZATION AND TYPES OF CLASSES

Type of classes	Workload hours	Distribution by forms of education, *hours*					
		Full-time		Part-time		Distance	
		Classes (C)	Individual work (IW)	Classes (C)	Individual work (IW)	Classes (C)	Individual work (IW)
lecture	80	26	54	-	-	6	74
practical	40	13	27	-	-	4	36
laboratory	-	-	-	-	-	-	-
workshops	-	-	-	-	-	-	-
TOGETHER	120	39	81	-	-	10	110

5 DISCIPLINE PROGRAM BY TYPES OF CLASSES

Ciphers DRN	Types and topics of training sessions	The volume of components, *hours*
	LECTURES	**80**
VR1.1-V1.2-1	**1 status and prospects of oil and gas from unconventional sources**	12
	The total potential of oil from unconventional sources	
VR1.1-V1.2-2 VR1.1-V1.2-3	**2 Features oil from unconventional sources**	8
	The main types of unconventional oil	
	Oil sands	
	Oil shale	
	Scenario unconventional oil	
	Prospects of unconventional oil in Ukraine	
VR1.1-V1.2-2 VR1.1-V1.2-3	**3 possible extraction of unconventional gas**	8
	The main types of unconventional gas	
	Shale gas	
	Central gas basin	
VR1.1-V1.2-1 VR1.1-V1.2-2 VR1.1-V1.2-3	**4 Technology production of unconventional hydrocarbons**	12
VR1.1-V1.2-2 VR1.1-V1.2-3 VR1.2-V1.2-1	**5 Methane deposits hazovuhilnyh**	4
	Concepts and definitions	
	The origin of the methane coal-bearing strata	
	The current state of development of coal gas to Ukraine	
VR1.1-V1.2-2 VR1.1-V1.2-3	**6 Gas compacted rocks**	4
	Overview of gas deposits compacted rocks	

Ciphers DRN	Types and topics of training sessions	The volume of components, *hours*
VR1.2-V1.2-1	Dense gas extraction	
	Reserves and production of tight gas in the world	
VR1.1-V1.2-2 VR1.1-V1.2-3 VR1.2-V1.2-1	**7 Biogas**	4
	Biogas as an alternative energy	
	Technology production of biogas	
	World experience extracting biogas	
	Prospects for biogas production in Ukraine	
VR1.1-V1.2-2 VR1.1-V1.2-3 VR1.2-V1.2-1	**8 shale oil**	4
	Overview of shale oil extraction	
	Background and achievements using oil-shale for oil	
	Technology shale oil	
VR1.1-V1.2-2 VR1.1-V1.2-3 VR1.2-V1.2-1	**9 hydrates**	4
	Technologies detect deposits of gas hydrates	
	Prospects for the extraction of gas hydrates in Ukraine	
VR1.2-V1.2-2	**10 Environmental concerns extraction of unconventional hydrocarbons**	10
VR1.2-V1.2-3	**11 Benefits and risks of energy production from alternative sources**	10
	Shale and Central basin gas	
	Coal bed methane	
	hydrates	
	PRACTICAL TRAINING	**40**
VR1.1-V1.2-1 VR1.1-V1.2-2 VR1.1-V1.2-3 VR1.2-V1.2-1	**1 Justification process parameters biogas plants**	40
	TOTAL	**120**

6 KNOWLEDGE PROGRESS TESTING

Certification of student achievement is accomplished through transparent procedures based on objective criteria in accordance with the University Regulations "On Evaluation of Higher Education Applicants' Learning Outcomes".

The level of competencies achieved in relation to the expectations, identified during the control activities, reflects the real result of the student's study of the discipline.

6.1 GRADING SCALES

Assessment of academic achievement of students of the Dnipro University of Technology is carried out based on a rating (100-point) and institutional grading scales. The latter is necessary (in the official absence of a national scale) to convert (transfer) grades for mobile students.

The scales of assessment of learning outcomes of the NTUDP students

Rating	Institutional

90 ... 100	Excellent
74 ... 89	Good
60 ... 73	Satisfactory
0 ... 59	Failed

Discipline credits are scored if the student has a final grade of at least 60 points. A lower grade is considered to be an academic debt that is subject to liquidation in accordance with the Regulations on the Organization of the Educational Process of NTUDP.

6.2 DIAGNOSTIC TOOLS AND EVALUATION PROCEDURES

The content of diagnostic tools is aimed at controlling the level of knowledge, skills, communication, autonomy, and responsibility of the student according to the requirements of the National Qualifications Framework (NQF) up to the 7th qualification level during the demonstration of the learning outcomes regulated by the work program.

During the control activities, the student should perform tasks focused solely on the demonstration of disciplinary learning outcomes (Section 2).

Diagnostic tools provided to students at the control activities in the form of tasks for the intermediate and final knowledge progress testing are formed by specifying the initial data and a way of demonstrating disciplinary learning outcomes.

Diagnostic tools (control tasks) for the intermediate and final knowledge progress testing are approved by the appropriate department.

Type of diagnostic tools and procedures for evaluating the intermediate and final knowledge progress testing are given below.

Diagnostic and assessment procedures

INTERMEDIATE CONTROL			FINAL ASSESSMENT	
training sessions	diagnostic tools	procedures	diagnostic tools	procedures
lectures	control tasks for each topic	task during lectures	comprehensive reference work (CCW)	determining the average results of intermediate controls;
practical	control tasks for each topic	tasks during practical classes		
	or individual task	tasks during independent work		CCW performance during the examination at the request of the student

During the intermediate control, the lectures are evaluated by determining the quality of the performance of the control specific tasks. Practical classes are assessed by the quality of the control or individual task.

If the content of a particular type of teaching activity is subordinated to several descriptors, then the integral value of the assessment may be determined by the weighting coefficients set by the lecturer.

Provided that the level of results of the intermediate controls of all types of training at least 60 points, the final control can be carried out without the student's immediate participation by determining the weighted average value of the obtained grades.

Regardless of the results of the intermediate control, every student during the final knowledge progress testing has the right to perform the CDF, which contains tasks covering key disciplinary learning outcomes.

The number of specific tasks of the CDF should be consistent with the allotted time for completion. The number of CDF options should ensure that the task is individualized.

The value of the mark for the implementation of the CDF is determined by the average evaluation of the components (specific tasks) and is final.

The integral value of the CDF performance assessment can be determined by taking into account the weighting factors established by the department for each NLC descriptor.

6.3 EVALUATION CRITERIA

The actual student learning outcomes are identified and measured against what is expected during the control activities using criteria that describe the student's actions to demonstrate the achievement of the learning outcomes.

To evaluate the performance of the control tasks during the intermediate control of lectures and practicals the assimilation factor is used as a criterion, which automatically adapts the indicator to the rating scale:

$$O_i = 100 \, a / m,$$

where a - number of correct answers or significant operations performed according to the solution standard; m - the total number of questions or substantial operations of the standard.

Individual tasks and complex control works are expertly evaluated using criteria that characterize the ratio of competency requirements and evaluation indicators to a rating scale.

The content of the criteria is based on the competencies identified by the NLC for the Bachelor's level of higher education (given below).

General criteria for achieving learning outcomes 7th qualification for LDCs (BA)

Integral competence is the ability to solve complex problems and specialized practical problems in a particular area of professional activities or in a learning process that involves the use of certain theories and methods of the relevant scientific areas and characterized by complexity and conditions uncertainty.

descriptors NLC	Requirements for knowledge, communication, autonomy and responsibility	Indicator evaluation
Knowledge		

8

descriptors NLC	Requirements for knowledge, communication, autonomy and responsibility	Indicator evaluation
♦ Conceptual knowledge acquired during the training and professional activities, including some knowledge of modern achievements; ♦ critical understanding of the main theories, principles, methods, and concepts in education and careers	- A great - proper, reasonable, sensible. Measures the presence of: - conceptual knowledge; - a high degree of state ownership issues; - critical understanding of the main theories, principles, methods and concepts in education and careers	95-100
	A non-gross contains mistakes or errors	90-94
	The answer is correct but has some inaccuracies	85-89
	A correct some inaccuracies but has also proved insufficient	80-84
	The answer is correct but has some inaccuracies, not reasonable and meaningful	74-79
	A fragmentary	70-73
	A student shows a fuzzy idea of the object of study	65-69
	Knowledge minimally satisfactory	60-64
	Knowledge unsatisfactory	<60
Ability		
♦ solving complex problems and unforeseen problems in specialized areas of professional and/or training, which involves the collection and interpretation of information (data), choice of methods and tools, the use of innovative approaches	- The answer describes the ability to: - identify the problem; - formulate hypotheses; - solve problems; - choose adequate methods and tools; - collect and interpret logical and understandable information; - use innovative approaches to solving the problem	95-100
	The answer describes the ability to apply knowledge in practice with no blunders	90-94
	The answer describes the ability to apply knowledge in practice but has some errors in the implementation of a requirement	85-89
	The answer describes the ability to apply knowledge in practice but has some errors in the implementation of the two requirements	80-84
	The answer describes the ability to apply knowledge in practice but has some errors in the implementation of the three requirements	74-79
	The answer describes the ability to apply knowledge in practice but has some errors in the implementation of the four requirements	70-73
	The answer describes the ability to apply knowledge in practice while performing tasks on the model	65-69
	A characterizes the ability to apply knowledge in performing tasks on the model, but with uncertainties	60-64
	The level of skills is poor	<60
Communication		
♦ report to specialists and non-specialists of information, ideas, problems, solutions and their experience in the field of professional	- Fluent problematic area. Clarity response (report). Language - correct; - - net; - - clear; - - accurate; - - logic;	95-100

descriptors NLC	Requirements for knowledge, communication, autonomy and responsibility	Indicator evaluation
activity; ♦ the ability to form an effective communication strategy	– - expressive; – - concise. Communication strategy: coherent and consistent development of thought; availability of own logical reasoning; relevant arguments and its compliance with the provisions defended; the correct structure of the response (report); correct answers to questions; appropriate equipment to answer questions; the ability to draw conclusions and formulate proposals	
	Adequate ownership industry issues with minor faults. Sufficient clarity response (report) with minor faults. Appropriate communication strategy with minor faults	90-94
	Good knowledge of the problems of the industry. Good clarity response (report) and relevant communication strategy (total three requirements are not implemented)	85-89
	Good knowledge of the problems of the industry. Good clarity response (report) and relevant communication strategy (a total of four requirements is not implemented)	80-84
	Good knowledge of the problems of the industry. Good clarity response (report) and relevant communication strategy (total not implemented the five requirements)	74-79
	Satisfactory ownership issues of the industry. Satisfactory clarity response (report) and relevant communication strategy (a total of seven requirements not implemented)	70-73
	Partial ownership issues of the industry. Satisfactory clarity response (report) and communication strategy of faults (total not implemented nine requirements)	65-69
	The fragmented ownership issues of the industry. Satisfactory clarity response (report) and communication strategy of faults (total not implemented 10 requirements)	60-64
	The level of poor communication	<60
Autonomy and responsibility		
♦ management actions or complex projects, responsible for decision-making in unpredictable conditions; ♦ responsible for the professional development of individuals and/or groups ♦ the ability to continue study with a high degree of autonomy	– Excellent individual ownership management competencies focused on: 1) management of complex projects, providing: - exploratory learning activities marked the ability to independently evaluate various life situations, events, facts, detect and defend a personal position; - the ability to work in a team; - control of their own actions; 2) responsibility for decision-making in unpredictable conditions, including: - justify their decisions the provisions of the regulatory framework of sectoral and national levels; - independence while performing tasks; - lead in discussing problems; - responsibility for the relationship; 3) responsible for the professional development of	95-100

descriptors NLC	Requirements for knowledge, communication, autonomy and responsibility	Indicator evaluation
	individuals and/or groups that includes: - use of vocational-oriented skills; - the use of evidence from independent and correct reasoning; - possession of all kinds of learning activities; 4) the ability to further study with a high degree of autonomy, which provides: - degree possession of fundamental knowledge; - independent evaluation judgments; - high level of formation of general educational skills; - search and analysis of information resources	
	Confident personality possession competency management (not implemented two requirements)	90-94
	Good knowledge management competencies personality (not implemented three requirements)	85-89
	Good knowledge management competencies personality (not implemented the four requirements)	80-84
	Good knowledge management competencies personality (not implemented six requirements)	74-79
	Satisfactory ownership of individual competence management (not implemented seven requirements)	70-73
	Satisfactory ownership of individual competence management (not implemented eight claims)	65-69
	The level of autonomy and responsibility fragmented	60-64
	The level of autonomy and responsibility poor	<60
